PROFILE

I'm a student of the Engineering in Information Technologies degree with a focus on UX/UI Design and Web Development, passionate about creating functional and attractive digital experiences. I am looking to gain experience, contribute to innovative projects, and help create technological solutions that improve user experience.

EXPERIENCE

UpsCoffee - University Project

2025

- Active participation in the design and development of an app for a university coffee shop using Angular.
- Project created to offer a digital solution to the increase in demand from the university community.

Web Development - SOLEMTI

Nov - Dec 2024

- Participation in the redesign of a website, designing prototypes in Adobe XD from user research.
- Worked as a team to plan the new structure of the website, integrating it into PrestaShop, focused on improving usability and user experience.
- Documented and designed content using Docusaurus for a technology organization.

Web Development - Treitek Technologies

Nov - Dec 2023

- Created and edited websites with dynamic designs using WordPress, integrated different sections and content using WooCommerce.
- Customized the interface and added styles using HTML, CSS, and JavaScript, focused on layout and good user experience.

EDUCATION

Universidad Politécnica de Sinaloa

2022 - Present

Bachelor's Degree in Information Technologies Engineering
